

microbar[®]

A COMPENDIUM OF MODERN
DIAGNOSTIC CONTRAST MEDIA

e: info@microbar.co.in w: www.microbar.co.in

microbar Range of Products

Radiology

- microbar Paste
- microbar Powder
- microbar Suspension
- microbar HD
- microbar RT
- microbar for Enema
- microbar Enema
(Disposable Kit)

CT

- CAT (1 Litre)
- CAT 2 (150 ml)
- Enema for CT
(Disposable Kit)

microbar[®]

microbar Paste

200 gm

- For study of pharynx and esophagus
- Combination of micro-fine and coarse particles
- Perfect mobility gives clear contours
- Highly palatable – Fruit flavour

microbar®

microbar Powder

3.5 Kg

175 gm

- Economical for routine GI Tract study
- Unique formulation containing coarse particles
- Flocculation-free
- Highly palatable – Vanilla Flavoured

microbar[®]

microbar Suspension

1 litre

150 ml

- Ready-to-use suspension for GI Tract multipurpose study
- Smooth, creamy suspension
- Flocculation-free.
- Excellent flow and perfect adhesion for accurate diagnosis
- Highly palatable – Fruit Flavoured

microbar[®]

microbar HD

300 gm

- Specially designed for double contrast radiography
- Gives 200% w/v density while remaining fluid
- Highly stable against stomach acids
- Excellent mucosal details by uniform coating
- Highly Palatable – Fruit flavour
- Gas pre-packed for optimal distension

microbar[®]

microbar for Enema

- microbar for Enema.
- microbar for Enema (Disposable Kit).

microbar[®]

microbar RT

125 gm

- Cost effective with minimum radiation exposure to patient
- Effective double contrast without extra air introduction
- Highly palatable – Fruit Flavour and non - gritty texture

microbar[®]

microbar for Enema

3.5 Kg

- Produces accurate diagnostic results for the large intestine
- Specially formulated to ensure no sedimentation even at higher dilutions
- Uniform flow ensures no clogged tubes or nozzles
- Most economical

microbar[®]

microbar for Enema (Disposible Kit)

400 gm

- Easy and convenient and economical one step Kit
- Smooth flow & evacuation, with non-kink tubing, multiple side holes at tip, stop valves, non-latex retention cuff for patient comfort & safety
- One Shot Inflator avoids over inflation of retention cuff
- Air Insufflator provided for double contrast

microbar[®]

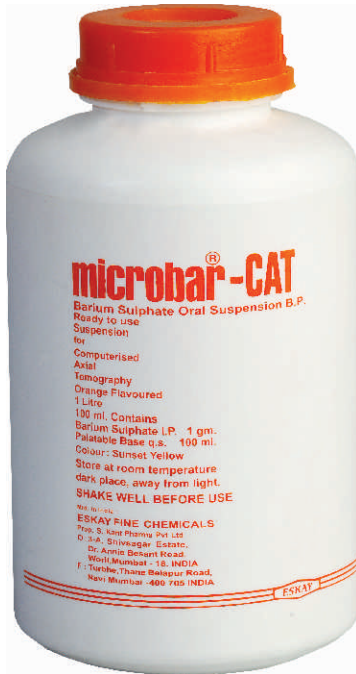

microbar CAT

- microbar CAT (1 Litre)
- microbar CAT 2 (150 ml)
- microbar for CT (Disposable Kit)

microbar[®]

microbar CAT

1 litre

- Ready to use suspension for opacifying GI tract for C.T. Studies.
- Offers clear delineation of small bowel loops from tumor masses.
- Can be safely used in patients where iodine compounds are contraindicated.
- Highly Palatable - Orange flavour

microbar[®]

microbar CAT 2

150 ml

- Convenient, low volume suspension for GIT examination.
- Choice from 1% to 2% w/v Barium concentration.
- Offers clear delineation and no artefacts.
- Can be safely used in patients where iodine compounds are contraindicated.
- Highly Palatable – Orange flavour

microbar[®]

microbar Enema for CT (Disposable Kit)

400 ml

- Ready to use 1.3% suspension for C.T. Studies
- Separate Enema Tubing with screw cap for easy administration
- Disposable 1 step system for speed and convenience
- Non- Latex retention cuff

microbar[®]

microbar Advantages

- Cost-effective
- Quality at fair prices
- Ever-expanding Radiology Range
- Ease of administration
- Trusted by doctors for over 40 years
